Photomontage

The process of selecting, editing and piecing together photographic images to create a new image.

To complete this activity you will need:
- Glue
- Scissors
- Magazines/catalogues

Remember to take care when using scissors!

1. Go through the magazines cutting out images that you like — the more random the better!

2. Here I am using 3 pictures but you may want to use more!
Your picture can be funny, thought provoking or just totally random!

It’s up to you—be as creative as you can!

Piece together your images to create different pictures

You can try lots of different arrangements!
5. Once you are happy with your creation, use your glue to stick it onto a piece of paper.

6. Draw and colour a background of your choice on your plain paper— or use other images to create a background.

Now all you need to do is create a story to go with your photomontage!
