

The following guide will show you how to download and configure the **Citrix Receiver** app for Android Devices. This will allow you to access **UCLan's Remote Access** service through your device.

Please Note: Images may differ slightly to what you see on your device

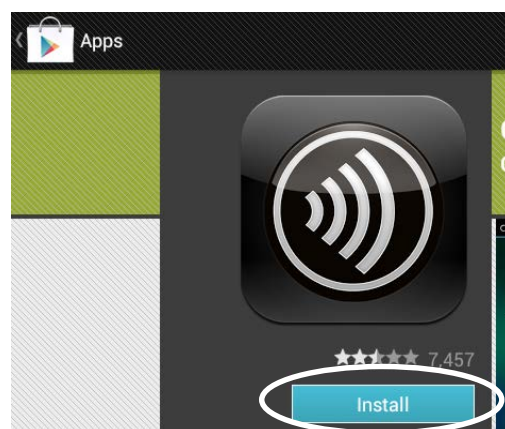

1. Ensure your device has internet access and open up the **Play Store**

2. Search for the **Citrix Receiver** app

3. Select **Install**

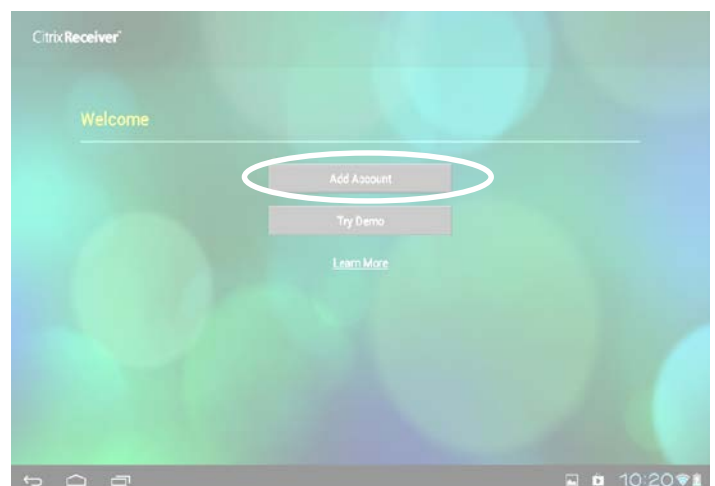

4. Select **Accept & download**

5. Once installed, the **Citrix Receiver** icon will be added to your applications. Select this icon to access it

6. Select **Add Account**

7. Enter the following into the **Address** field:

ra.uclan.ac.uk

8. Select **Next**

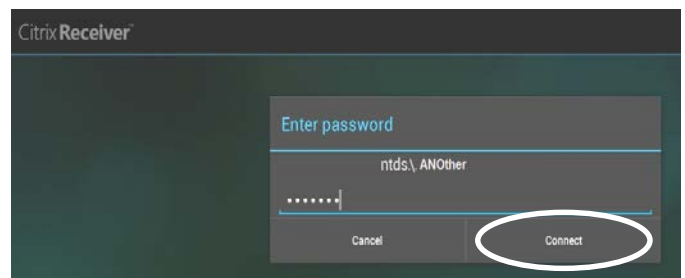

9. A page titled **Add Account** will appear, Enter the following:

- **Address:** ra.uclan.ac.uk
- **Description:** Do not change
- **Username:** your UCLan username
- **Password:** Leave this field blank
- **Domain:** ntds
- Select **Log On**

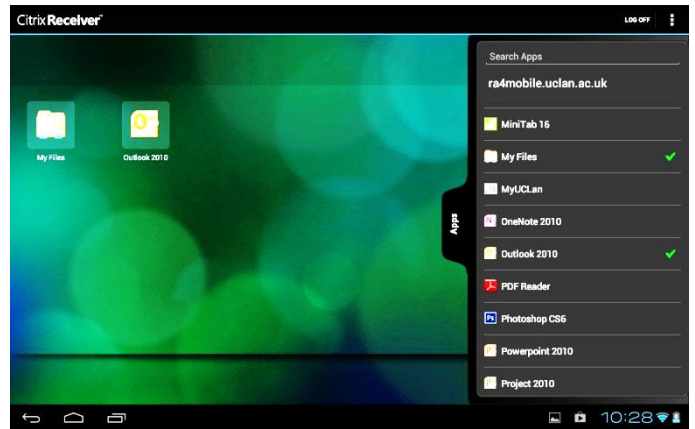

10. You will then be asked your UCLan password. Enter your UCLan password and select **Connect**

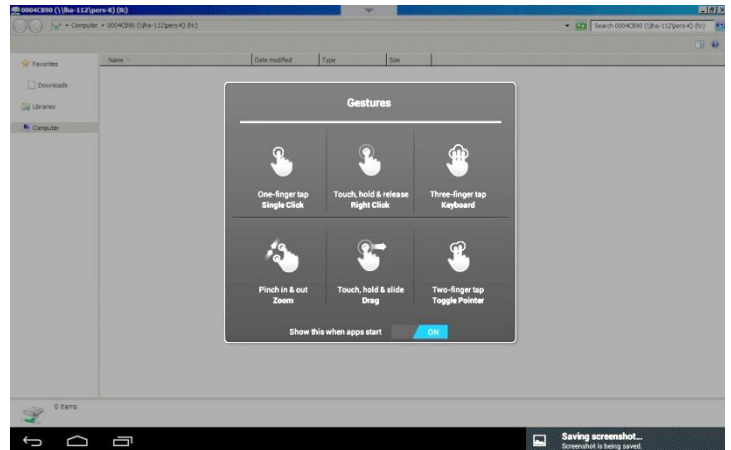

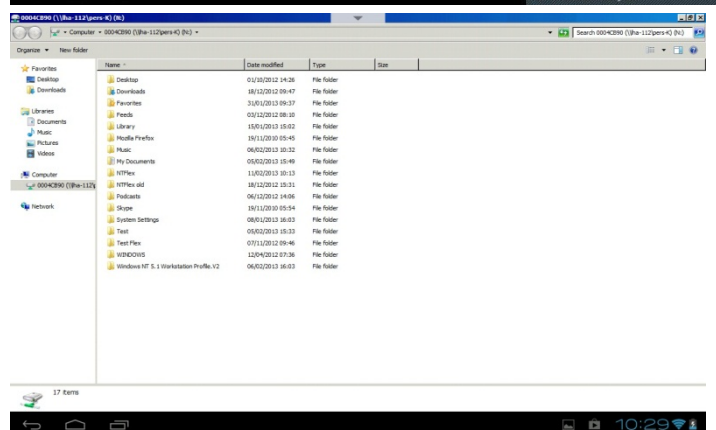

11. Once you have logged in a list of applications will appear. You can select the applications you would like to appear on your home screen. Tap the icon to open an application

12. If you are using Remote access for the first time a screen with instructions will appear. Tap the screen in order to remove the **Gestures** box

13. You can now use the application as you wish e.g **My Files** and access documents

Please Note: Once you have installed **Citrix Receiver** and added your account, please ensure you have set up a passcode to lock your device. This will prevent anyone from gaining access to your UCLan files, and data.

Ensure you **close** Citrix Receiver once you have finished using it.
