

Do you struggle to read?

A lot of people do. Around 1 in 10 people have trouble reading

Perhaps the words jump around the page or maybe you can't concentrate when reading a lot of text

Or it could be just when you're tired

How's your writing?

Do you make a lot of spelling mistakes? Or maybe you have difficulty remembering words and ideas which may interrupt your train of thought?

Or you might even have problems organising work?

Get it checked!

You can find out what your learning style is or if you show signs of dyslexia : <http://www.netquickscan.co.uk/QS5/UCLAN/QSStart.htm>

Learning Technology

There is an application called **Read and Write** which could help you. It's available on the University Network

read&write

Read and Write

On the UCLan network, you can install a piece of software called **Read and Write**. It has a wide range of apps which can help you with the creation of work and listening back.

What does it do?

It can read text out-loud using

It has an easy to use dictionary that can have definitions read aloud and see a word is used in a sentence

What else can it do?

There's a word prediction feature that helps suggest words as you type

There's also Factfinder, which can help make research easier, creating a bibliography as you do it

You can even convert a whole document into an MP3 - great for research and revision!
