

# How to Install Software on the UCLan Network

1. Select **Start** and Locate and select **Application Catalogue**

2. The following window will be displayed.

3. Select the software you want to install from the list e.g **End Note**
4. Select the **Install** option and the software will then install to your computer

**Please note:** installation time will vary depending on your chosen software

Once Installed the software shortcut will appear on the **All Programs** menu. It may appear in a specific folder for the application. If you are having difficulties finding it after you have installed the software then you can search for it. Select Start and type the name of the software – e.g. **Endnote**.
