

WebDAV (Internet File Access) Apple Mac

1. Within **Finder > Select Go**
2. Select **Connect to Server**

3. Enter the following URL in **Server Address box**:
`https://webdav.uclan.ac.uk` followed by your username – e.g.
<https://webdav.uclan.ac.uk/another>

Tip: clicking the plus button will add the server to your Favourite Servers list for a quick connection next time

4. Enter your **UCLan Username** and **password** when prompted and then select **Connect**

Please note: By default the WebDAV drive will not be connected the next time you log in, the server address will still be available in the Connect to Server window
