UNIVERSITY OF CENTRAL LANCASHIRE

SMOKING POLICY FOR STUDENTS

THE UNIVERSITY'S VIEWS ON SMOKING

As part of its continuous review of health and safety matters, the University has considered the current evidence of the health risks associated with passive smoking, as well as the discomfort suffered by non-smokers exposed to tobacco smoke. The University seeks to maintain a healthy and comfortable studying environment for staff, students and visitors through the implementation of its Smoking Policy.

POLICY STATEMENT ON SMOKING

1. The University operates a total ban on smoking throughout the University's buildings, prohibited areas as indicated directly outside of such buildings and in University vehicles.
2. This smoking policy covers all substances that a person can smoke. These include manufactured cigarettes (e-cigarettes), hand-rolled cigarettes, pipes, cigars, herbal cigarettes and water pipes (including shisha or similar).

PRINCIPLES OF IMPLEMENTATION

1. Publicity and Signage

1.1 The University's policy on smoking shall be indicated on prominent notices displayed in the main entrances of all buildings.

1.2 Students smoking in prohibited areas will be asked politely to stop and advised that they are breaching University policy.

1.3 A refusal to stop is unacceptable and may be reported to the Dean/Head of School to which that student belongs. It is the responsibility of the Dean/Head of the School to take action for breaches of this policy by students within their particular school.

2. Support to Smokers

2.1 The University takes a positive attitude regarding the health and safety of all its students. Any student who smokes and wishes to use the no smoking policy as an opportunity to give up or cut down will be supported and should contact the University's Welfare team who will refer the Student to the local NHS Stop Smoking service.

2.2 Students who experience difficulties in complying with this policy may discuss this with the University's Welfare team.

3. Smoking in the Open Air

3.1 Where study related activities such as external student placements are carried out on land owned by other external parties, smoking may be permitted in designated areas during break periods only if the policy of the external party allows for this. It is the responsibility of the student to ensure that they comply with external party's smoking policy. A breach of that external party's policy shall be dealt with by the University as if it were a breach of this policy.

3.2 When permitted, smoking in the open air on University land must be undertaken away from areas of risk such as fuel storage tanks, chemical storage facilities and building entrances.

3.3 Smoking is not permitted immediately outside the entrances or open windows of any University buildings

3.4 It is important to note that cigarette butts are the number one littered item in England and fines of up to £80 can be issued for littering in a public space. As a unique form of litter - they are small, smelly and on fire - they must always be extinguished and disposed of in a designated receptacle e.g. cigarette butt bin which can be found across campus.

4. Enforcement of the Policy

4.1 As with other aspects of health and safety policy, all students have a responsibility to look after themselves and others and a duty to comply with this policy as part of the health and safety provisions of the University..

4.2 It is expected that students will co-operate voluntarily in making the policy work without the need for more formal measures to ensure its effectiveness. However, breaches of the policy may lead to disciplinary action and may leave the University open to criminal prosecution under smokefree legislation.

4.3 Students (and their permitted visitors) who do not comply with the implementation of smokefree legislation from the 1st of July 2007 may also be liable to a fixed penalty fine and possible criminal prosecution.

5. Visitors

5.1 To achieve the aim of a smoke free environment, this policy will also apply to visitors to all buildings. Should a student bring a visitor to the University, they should ensure that such visitors are made aware of the University's policy in relation to smoking and not allow them to smoke in those areas in which Students of the University themselves are prohibited from smoking in under this policy.
